

Team pushing rock up hill: image full text description

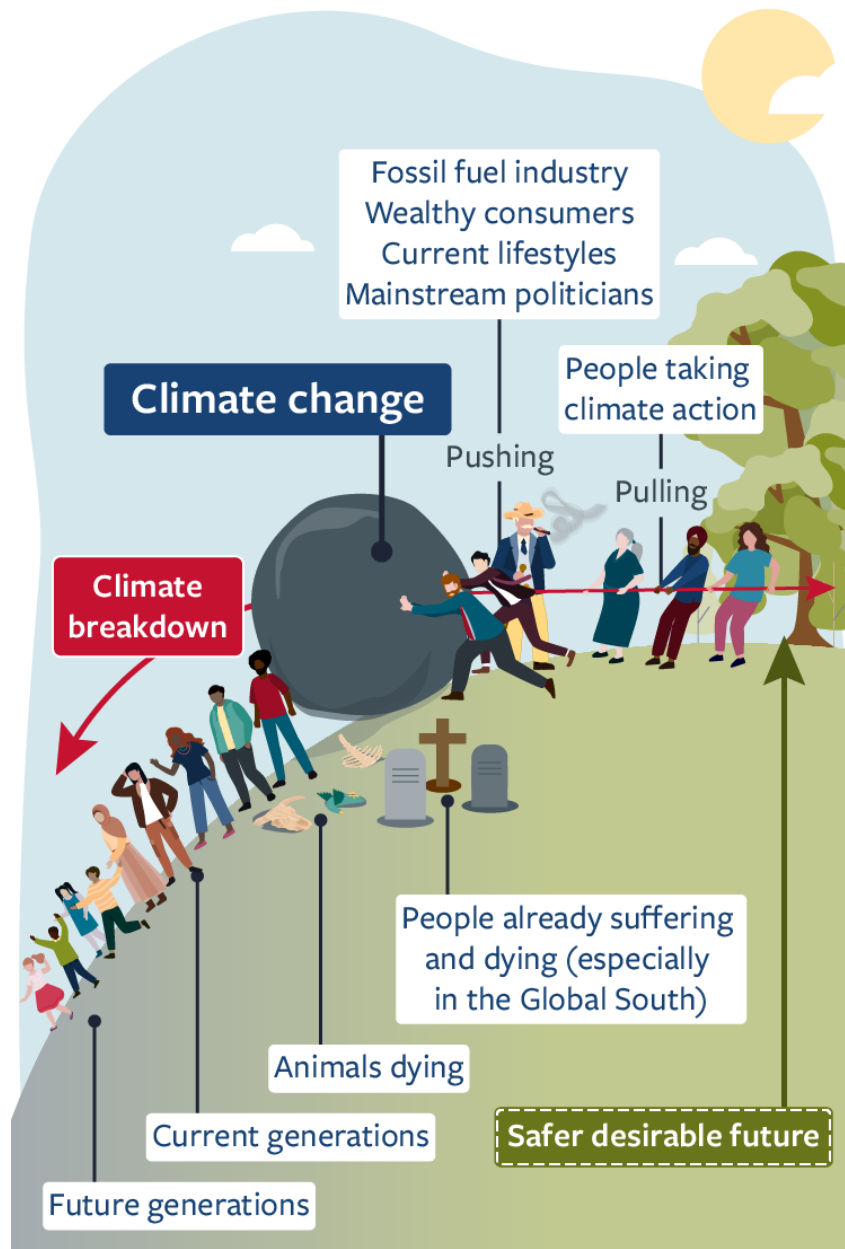

Image description

The image is an illustration depicting the forces influencing climate change and its impacts. The central element is a large black ball labelled "Climate change." This ball is being pushed and pulled by different groups of people and entities from the right side.

The groups of people on the pulling side, staying away from the ball, are not categorised but labelled as "People taking climate action". However, the group of people, staying closer and pushing the ball, are consists of following groups:

- Fossil fuel industry,
- Wealthy consumers,
- Current lifestyles,
- Mainstream politicians.

The ball is being pushed towards a downward slope labelled "Climate breakdown." Along this slope, various negative impacts with representative images are labelled:

- Gravestones: "People already suffering and dying (especially in the Global South)",
- Dead animals: "Animals dying",
- Young people: "Current generations",
- Kids: "Future generations".

These individuals are depicted as pulling the ball towards a green area labelled "Safer desirable future."
