Dear Dr Gerald P Workalot,

Rebecca Davies. 18/10/2012. 47 Marston view, Loughton, LO62 2BV

Thank you for referring this 8-year-old girl who has diagnoses of autism and ADHD. She has undergone genomic screening for this via an array CGH test, and she has been found to carry a 16p13.11 micro-duplication. I would be grateful if you could arrange testing for her family for this micro-duplication.

Yours sincerely

Dr P Khan

Consultant Paediatrician
