

Learning objectives

What are the advantages of sharing learning objectives?

For learners

- they can settle learners at the start of the lesson
- they help learners to understand what they should achieve

For teachers

- they help teachers to focus on what learners should know and be able to do by the end of a subject topic
- they help teachers to plan and design tasks which help learners to achieve the outcomes
- they provide a checklist to help teachers identify how far learners have achieved the outcomes
- they provide a checklist to help teachers give feedback to learners
- they focus on the learner rather than the teacher
