

# SIT771 Object Oriented Development

## Getting Ready for Week 1

---

### Overview

In this unit you will need access to a computer on which you will be able to create and run programs. We will be using the .NET Core, Visual Studio Code, together with SplashKit to introduce you to Object Oriented Programming.

To help get yourself ready for week 1, you can start by installing the necessary tools... All of the tools you need work cross platform, so you should be able to use your favourite operating system.

Use the following links to watch the instructions you need to get started installing these tools:

- [Linux](#)
- [MacOS](#)
- [Windows](#)

There is a [discussion board](#) where you can ask questions and get help. You should have received an invite for this, if not please contact me (Andrew Cain) at [andrew.cain@deakin.edu.au](mailto:andrew.cain@deakin.edu.au) and I will look into it for you.

We look forward to meeting you all soon.
