### Employability Skills Feedback

| Employability skill  | Using the skill  |
|--|--|
| How you work<br>3) Working under pressure and to deadlines | I must ensure that all work is completed in time to analyse and present at the conference. So I will create a project plan with milestones to ensure I remain on target  |
| How you work with others<br>6) Teamwork                    | As I will be leading a team, it is important to make best use of the skills available within the team and to ensure we work well. I will share the project plan documents and my skills and the other team members can select objectives and milestones they best feel suit their talents and take ownership of those. We will meet regularly to discuss progress and future planning. |
| How you think<br>10) Numeracy and IT skills                | I will be using appropriate data collation techniques and statistical analyses to interpret the research outputs. I will make effective use of multimedia and power point to create an engaging conference talk to relay the information.  |
