

What is the Emergency Laparotomy Collaborative?

It is a joint approach to save lives

- ▶ We are working with 30 hospitals across three Academic Health Science Networks (AHSNs)
Kent, Surrey and Sussex, West of England and Wessex
- ▶ It is a 6-step care bundle that is evidence-based

We need you to be involved!

Please fill in your NELA data fully and as accurately as possible.

ALL patients who undergo an emergency laparotomy have an **11%** risk of dying in hospital.

Patients over 70 years old have a **20%** risk of dying.
