

<p>Whole large biscuits- definitely solid</p>	<p>We can pick up this solid, it's hard and inflexible.</p>	<p>We can break the solid, but it is still in large pieces.</p>
		
<p>Put the biscuits into a bag and start to break them down with a rolling pin.</p>	<p>The biscuits are now in thousands of very small pieces.</p>	<p>The biscuit pieces are now able to be poured into a container.</p>
		
<p>The biscuit pieces can be poured into containers of different shapes.</p>	<p>The pieces will spread out to fill the container.</p>	<p>Looking at the pieces they are smaller but still solid pieces.</p>
