

To Form Body:

To Form Feathers:

Instructions adapted from ©Chinet

MAKE YOUR OWN TURKEY NAPKIN

You will need

- 2 large starched napkins
- Tinfoil (optional)

The process

Steps 1–2

Fold the two top sides of a napkin into the centre and press firmly (all folds will need to be pressed in this way as you continue).

Steps 2–4

Then fold the napkin diagonally in half.

If your napkin needs extra support, you can open the napkin up and fit a triangular folded piece of tinfoil into the triangle shaped centre crease of the napkin. The length of the foil triangle should allow for a bend at the bottom to keep the napkin upright and to form the breast and head of your turkey.

Steps 5–6

Refold the napkin over the top of the tinfoil, and fold the napkin diagonally in half a second time.

Steps 7–10

Now fold the napkin in half and fold over the tip of the napkin to form the head and beak of your turkey. The turkey head and body should now be sitting upright and the open edges of the napkin should be at the back.

Steps 11–12

To make the feathered tail of your turkey, fold a second napkin into a rectangle shape, then accordion fold the napkin, leaving a few inches of the napkin unfolded.

Steps 13–14

Turn the napkin over so the accordion portion faces down and fold napkin in half.

Steps 15–16

Fold and tuck the unfolded portion into the central accordion slot. You now have a fan shape that will form the feathered tail of your turkey.

Step 17

Place the tail on top of the body of the turkey and voila! You have a Christmas Turkey centrepiece!
